Invest in patient care
The Kidney Patient Protection Amendment pushes for-profit dialysis corporations to spend more money on direct patient care. If passed, dialysis corporation revenues will be limited to no more than 15% above the amount they spend on patient care. By linking revenue to care, dialysis corporations will have a greater incentive to invest in patient care.

Lower healthcare costs for all Ohioans
When we stop dialysis companies from overcharging we can bring down the cost of healthcare premiums for all of us.
